

The Agatec CPL50 is a cross line laser with built-in 180° plumb beam, ideal for floor-to-ceiling point transfer.

It also has horizontal and vertical fan angles, cross line, and locked line angle in manual mode which allows you to match an angle between any two points.

It features pulse mode for outdoor detector use (optional).

Delivered with drywall adaptor, especially designed for studs installation, and swivel mount, for inclined levels.

- High visibility cross line, with plumb up and down
- Full package, with swivel and magnetic multi use mount
- It works also outdoor, with laser receiver (optional)
